^{2 (}a)"De facto" population. Annual data are for June. (b) At current market prices. Annual data are totals of the four quarters. (c) Output of building and civil engineering work, excluding the output of building operatives employed by private firms outside the building and civil engineering industrics. (c) New series not strictly comparable with previous figures. Value for first quarter of 1955 on the former basis was £276 million.

Note.— Until the end of 1954, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data have been revised accordingly. Monthly figures for 1955 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month 4

for 1994 have been revised accordingly. Monthly figures for 1965 are provisional and represent registrations filed in Provincial Vital Statistic under review, regardless of the month of occurrence.

**OEstimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952.

**OEstimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952.

**OEstimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952.

**OEstimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952.

**OEstimates are given by years as of June 1 and by quarters for Canada as of June 1, 1952.

**OEstimates are given by years and deaths.

**OPIMISTATION OF THE STATE OF THE ST (3) Not applicable to figures on Newfoundland is included as of

Table 4.—POPULATION,(1) BIRTHS,(2) MARRIAGES AND DEATHS(3)—Continued Monthly Averages or Calendar Months(3)

O'Accrued net income of farm operators from farm production. The seasonally adjusted data include an arbitrary amouthing of crop production, standard seasonal adjustments for live-stock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

"This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board.

Bource: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

(i) Excludes gold. (ii) Arithmetically converted from 1935-39=100. (ii) Excluding Newfoundland. The prices of wentern grains prior to August, 1954, are final prices whereas those used since are initial prices for wheat and initial prices plus interim payments for onts and barley. (i)As of April, 1949, Newfoundland data are included.

(ii)Annual computation to 1983 entails considerable adjustments in production and external trade as exibed on page 19 of the Coal Report for 1983.

(i) As of January 1954 and January 1955, a number of distributors not previously reporting were added to the survey.

(ii) Includes gas used for house heating.

(iii) Increase in natural gas sales and decrease in manufactured gas sales caused by transfer of large company from manufactured to natural gas.

Note: Iron use shipments and silver and gold production include Newfoundland as of April and as of May, 1949 respectively.

(i) Includes copper fine in ore, ingots, bars, billets, rods, strips, sheets and tubing.

(ii) Includes newfoundland as of May, 1949.

(iii) Includes lead in ore and in pigs.

(iii) Includes newfoundland as of May, 1949.

(iii) Includes lead in ore and in pigs.

OAs at end of period. O'Total inventories held including manufacturers' own inventories and that portion not owned by reporting firms but financed by Progress payments. O'Inventories include manufacturers' own investment only. O'Includes primary iron and steel, iron castings, sheet metal products and wire and wire products. O'Includes heavy electrical machinery, office, household and sture machinery and industrial machinery. O'Excludes heavy electrical machinery. ^{*}Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments universe for the industry from the Annual Census of Industry Survey.

⁽¹⁾Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry at the end of December, 1953. The latter were obtained from a survey of all manufacturing firms with a production value over \$50,000.

The sample of firms reporting monthly accounted for 78% of the total estimated Unfilled Orders Value in December, 1953.

(a) Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

O'Releases of domestically manufactured tobacco for consumption in Canada.

Darrels of 25 gallons each.

Commencing with April, 1949, Newfoundland is included.

Note: Newfoundland is included as of April, 1949, in data for wood-pulp and newsprint.

(a) Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

(b) Total pulp production covers "screenings" are excluded throughout from mechanical and chemical pulp.

(i) Includes some silvery pig iron formerly included with ferro-alloys.

(ii) Excluding producers' interchange. all other chapse, wire and wire rope. Beginning January 1954, imports exclude castings, forgings, fittings and couplings. Source: Primary Iron and Steel, D.B.S.

(4) Imports include, in addition to (4) Monthly average.

*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Mortpoolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete enumeration.

O'The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 823, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

O'As of Jamary, 1950, Newfoundland is included.

("Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.

("Castoms exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.

("Annual data are monthly averages of crop year. ("Includes eggs for hatching.

O'The trade figures have been adjusted to conform to balance of payments definitions of the international exchange of commodities.

(a) Balance also reflects all other curent transactions.

(b) Net sales (+) or purchases (-) by Canadians of Canadian and foreign securities (trading, new issues and retirements.)

Sources: Quarterly Estimates of the Canadian Balance of International Payments, D.B.S. and Statistical Summary of Bank of Canada.

Beginning with April, 1950, Newfoundland is included.

(O)In the upper section of this table, the annual statistics prior to 1954 embrace all steam railways, while monthly averages for 1954 and monthly data refer to railways with annual operating revenues of \$500,000 or over.

(S)Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

(i)Prior to July, 1954, all figures in this section are daily averages. From July, 1954, Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month.

(ii) From July, 1954, the figures are not adjusted for items in transit.

(iii) Prior to July 1st, 1954, the statutory minimum requirement was 5 per cent for each day; since that date it has been a monthly average of 5 per cent.

(iii) Mainly deposits of foreign banks.

(iii) Figures for June 30, 1954, and later, are not adjusted for items in transit and are not strictly comparable with those for earlier dates. The figure for June 30, 1954, after adjustment for items in transit, was 3,789.

Excess of Revenues Over Expenditures						

NOTE: This statement does not include any receipts other than revenues nor any disbursements other than regular budgetary expenditures. Excluded, for example, are all receipts arising from repayments of loans and advances, or from accumulations on annuity, pension and insurance funds. Similarly excluded on the expenditure side, for example, are all Govt. outlays arising from increases in loans, advances and investments.

Nota.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and peace bank without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. "Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the masses of reporting new business. On a comparable basis, the Canada total in August, 1955 was 12% above that of August, 1954.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to set profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies carning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(i) Includes, in addition to the industries listed, Agriculture, Forestry, Flahing and Construction.

(ii) Includes, in addition to the industries listed, Agriculture, Forestry, Flahing and Construction.

(iii) Includes, in addition to the industries listed, Tobacco, and the industries listed, Tobacco, and the industries of the groups by about \$11,000,000 per quarter in 1984. Although the totals have been adjusted by these amounts it is not possible at present to allocate the differences to the individual groups.

*Assignments made under the Bankruptcy and Winding-Up Acts.

O'Quarterly data for the last five columns are monthly averages.

O'In the Bankruptcy Act of 1999, provision is made for proposals from insolvent persons. Since July, 1980, agreements made under this method are not included with the statistics of bankruptcies.

Liabilities of insolvent persons making proposals are not available.
